## **R&D SEA-DOO GTX 4TEC 2.5 DEGREE NOZZLE WEDGE KIT**

The R&D 2.5 degree reduction nozzle wedge kit for the new SEA-DOO 4Tec was designed, developed and tested extensively in all types of flat and rough water conditions to ensure that there would be no compromises any where in the SEA-DOO 4Tec's handling performance! Most brands of watercraft have some form of V.T.S. (variable trim system) including other model SEA-DOO's. Why the 4Tec doesn't have a trim system is a mystery. It's about the only feature that this model is missing! Extensive testing has led our development team to wedge the reduction nozzle up 2.5 degrees which will inexpensively give your 4Tec better handling everywhere and provide a boost of **1 to 2 mph in top speed performance**. The billet aluminum CNC machined 2.5 degree reduction nozzle wedge kit was designed to work with the OEM O.P.A.S. system and installs easily in 15 to 20 minutes with R&D's "easy install" directions.
