## **R&D SEA-DOO GTX 4Tec AQUAVEIN**

R&D's new aquavein scoop grate kit that is now available for SEA-DOO's new supercharged model is an absolute necessity to tame the cavitation that is created by SEA-DOO's new supercharged 1500cc 185 HP beast of an engine! Zero cavitation and quicker acceleration from 0-30 mph is what you can expect from R&D's new 2 bar, full-winged design. Improved low and high-speed cornering, greater straight-line stability, and an increase of .50 mph in the top speed department! The new R&D 4Tec aquavein grate installs easily in minutes and has been tested extensively with both the OEM impeller and the new R&D/Skat-Trak 16/21 3-blade impeller. The R&D/Skat-Trak impeller and aquavein scoop grate combination nets a bolt on performance boost of a full 1.5 mph gain in top speed!

The new R&D SEA-DOO GTX 4Tec aquavein scoop grate delivers the same impressive performance results on the non-supercharged GTX 4Tec. Impeller pitch combinations will vary due to the horsepower difference. Call R&D Performance today for impeller updates and the latest performance tricks for the new SEA-DOO GTX 4Tec.
