Sea-Doo RXP Auto Trim Kit Now Available

The R&D RXP 215 Auto Trim Kit was developed to override the OEM VTS System with a fully adjustable and fully automatic trim system! The R&D Auto Trim automatically drops a rider preferred adjustable 2-8 degrees. Drive from turn to turn never worrying whether the trim is in the best position for perfect turn negotiation! The R&D Auto Trim allows you to set the trim up your way to carve perfect turns every time! For long straight rides install the R&D VTS/Holeshot Driver Rod, which works in conjunction with the R&D Auto Trim to electronically override the Auto Trim back to the OEM VTS Nozzle angle trim settings! The combination allows the best of both worlds for recreational and closed course riding!

HTCAL05

125-21200 and 125-31200

Honda Pro Series Sponson Kit Now Available

The new R&D Honda Pro Series Sponson Kit was designed and developed to deliver lots of handling performance with adjustability options, which allows you to setup your Honda your way with 2-position sponson blade adjustability. R&D Pro Series Sponson Kits have been extensively offshore, race track, 1 up recreational, and 2 up recreational tested to guarantee a comfortable setting for any riding style! The R&D Sponson Kit will deliver a much smoother and more predictable ride over O.E.M. sponsons. Low speed and high-speed turns are a breeze with new found control! Track tested, recreationally proven, it's the only sponson kit you will ever need!
